

ABSTRACT OF THE DISCLOSURE

PIVOT LINK FOR SHEET BENDING BRAKE AND SHEET BENDING BRAKE INCLUDING PIVOT LINK

5 A guide mechanism for use with a sheet bending brake has a clamping
member having a lower leg extending therefrom, a pivot arm and a guide mechanism.
The pivoting arm being pivotally supported by and extending from the clamping
member to define a clamping area with the lower leg. The guide mechanism reacts
between the clamping member and the pivoting arm for moving the pivoting arm
10 between an open position and a closed position.
